TLS4 – Making Molds Using Silicone Plastique by *Carolyn McVicker*

\$117

Come join me as I demonstrate how to make molds using silicone plastique. Once you have seen how to make the mold, you will also have time to make one yourself during the luncheon. Once you find out how easy it is to make molds using silicone plastique, you’ll begin to think of other items you can make using the compound. The compound I use is food safe, meaning that molds can be made for items which can be safely eaten by humans and animals. You’ll find that you may want to make molds for cakes and deserts for your own family when you return home. Your gift is a package of 10 different molds for breads and other food items with a photograph of each of the molded items.
