

Faux Valentine Heart Candy Box

Supplies needed: 1/2 inch wood hearts (available on Amazon); various heart stickers (should be able to find these almost anywhere around Valentines day or on Amazon); ribbon (can be silk, metallic or your choice) tweezers, tacky glue.

Various stickers will determine the finished size of your candy box

Paint edges of heart (red/gold/silver) you choose

Put 2 stickers of the same size together so you have a finished red heart on both sides. You will need 2 sets for each box (4 stickers total)

Glue a piece of narrow ribbon to the back side of one set of stickers and fold over diagonally to front, across front and glue to back.

Glue wood heart to one set of stickers (doesn't matter which set and then glue other sticker set to form candy box. Decorate as you like or leave with just the ribbon across the front.
