The window and door details were Karen's inspiration to reproduce the shop in 1:48 scale. You are only limited by your imagination in decorating the interior space. The workshop includes everything shown in the photos and can be completed in the workshop time allowed - except the flowers along the top will take a little longer. This is a 2 part structure – a Front Exterior Box and an Interior Box that is removable from the back. No lighting is required because there is an acrylic covered opening in the top – it is, however, very easy to light with a battery pack and 2 mega LED lights which Karen will demonstrate during class. **F8 – 1/2” Scale Circus Roses in a Vase** *by Susan Karatjas*  
**Class Fee: \$49**

I wondered what kind of class to offer when the theme is the circus??? As many of you know, I love making flowers. My husband, Nick, and I were discussing this when he suggested Googling “circus flower.” Well to our surprise there is a rose named the Circus rose and it is stunning. The Circus Rose was created by crossing several other roses. The result was this gorgeous yellow rose that produces great reddish edges. These are colors that represent the excitement of the circus to me. So with all this in mind, I offer you a class in making a 1/2” scale Circus Rose in a vase. Learn to color, shape, and assemble the roses in a glass vase. The class will use Copic markers to color the laser cut sheets. Included in the kit are materials to make the flowers pictured, a 1/2” scale glass vase, and step-by-step illustrated instructions. Magnification or a small light is optional. Bring pointed tweezers, small scissors, and your basic toolkit. I will supply the rest. 5/8” x 5/8” x 7/8”
