NAME Day 2023:

In picture two you see:
Princess style table:
1 Hanging wall planter:

on the other.
This is seen in both picture two
and picture three

X rated end table:

There are other small items like
several beads I used as vases or
decorations:

My kit will contain:

The round base 2 1/2" in diameter so it will fit into an acrylic baseball cube to keep it dust free.

The 2 walls, one with a window and a passthrough cut out of it.

The layered door is the other "wall" and comes with 2 crystal "knobs" which can be painted.

The window opening has frames with faux stained glass to go in them, along with a shelf for the passthrough.

The short wall also has a shelf on top of it to hold some items.

4 small house shaped pieces with NAME scored into the front of them.

That comprises the "basic" kit which **is \$15.00 plus \$12.00 shipping.**

Now lets add some wonderful items to dress it up. I have pulled various items from several of my regular kits so they are all quarter scale so can be used in any scene if you do not want to use them in this vignette. Nothing has been shrunk to make them fit in this vignette.

Items offered are not exactly as in the picture, those came from my stash but these will work great. No flowers, greenery or graphics are included.

No further shipping charged when ordered with the basic kit!!
